8. Thank You

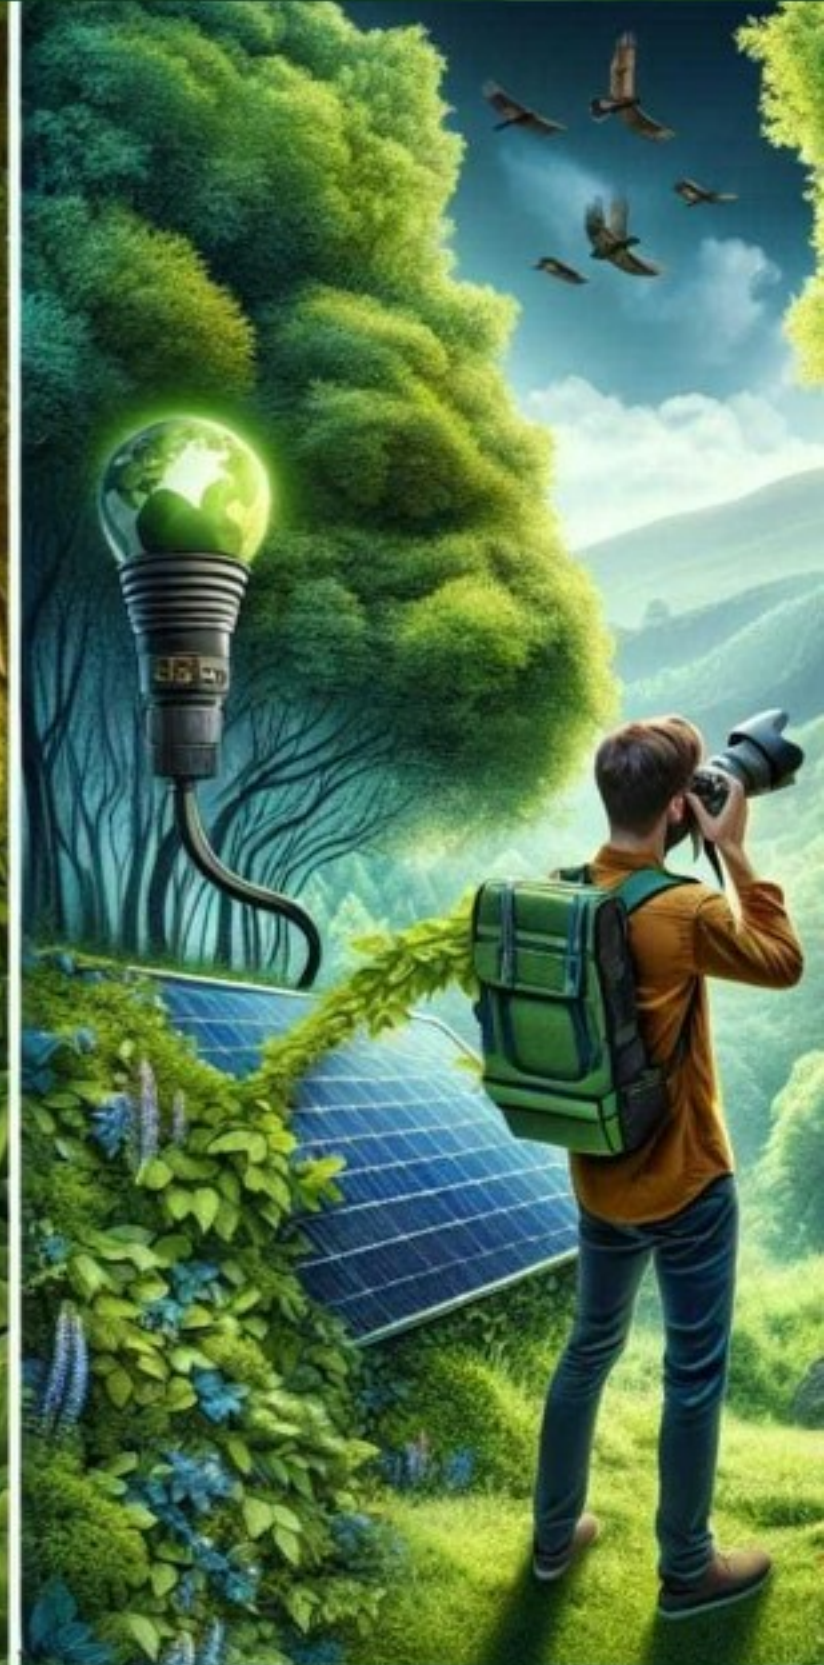

Introduction

- Eco Eye is a ground breaking technology company that offers advanced bird species monitoring system with the help of AI.
- Our solutions Help you track, monitor, and analyze bird species to protect their habitats and protect biodiversity.

Climate Effect

- Climate Change has significantly impacted bird population and contributed to species decline and extinction.
- For Example: rising temperature alter habitat suitability, affected breeding, nesting, and migration patterns.

Features

01

Acurate Bird Identification.

02

Acurate Migration Tracking.

03

Real-Time Prediction.

04

User-Friendly Interface.

Who can benefit ?

Birdwatchers

Researchers

Conservationists

Students

How it Works ?

- User Uploads an Image of a bird.
- Eco Eye's model analyzes key features using OpenCV.
- Predicts the species of the bird with high accuracy .
- Provides instant results to the user.

Let's see it in next slide!

The Future of Bird Monitoring

Why our Solution

- **Time-Saving:** Instant identification without manual research.
- **Accuracy:** Reliable predictions based on robust algorithms.
- **Accessibility:** Available anytime, anywhere through our platform.
- **Educational:** Enhance understanding and appreciation of birds.

Future Developments

01 Continuous Improvement: Refining algorithms for even better accuracy.

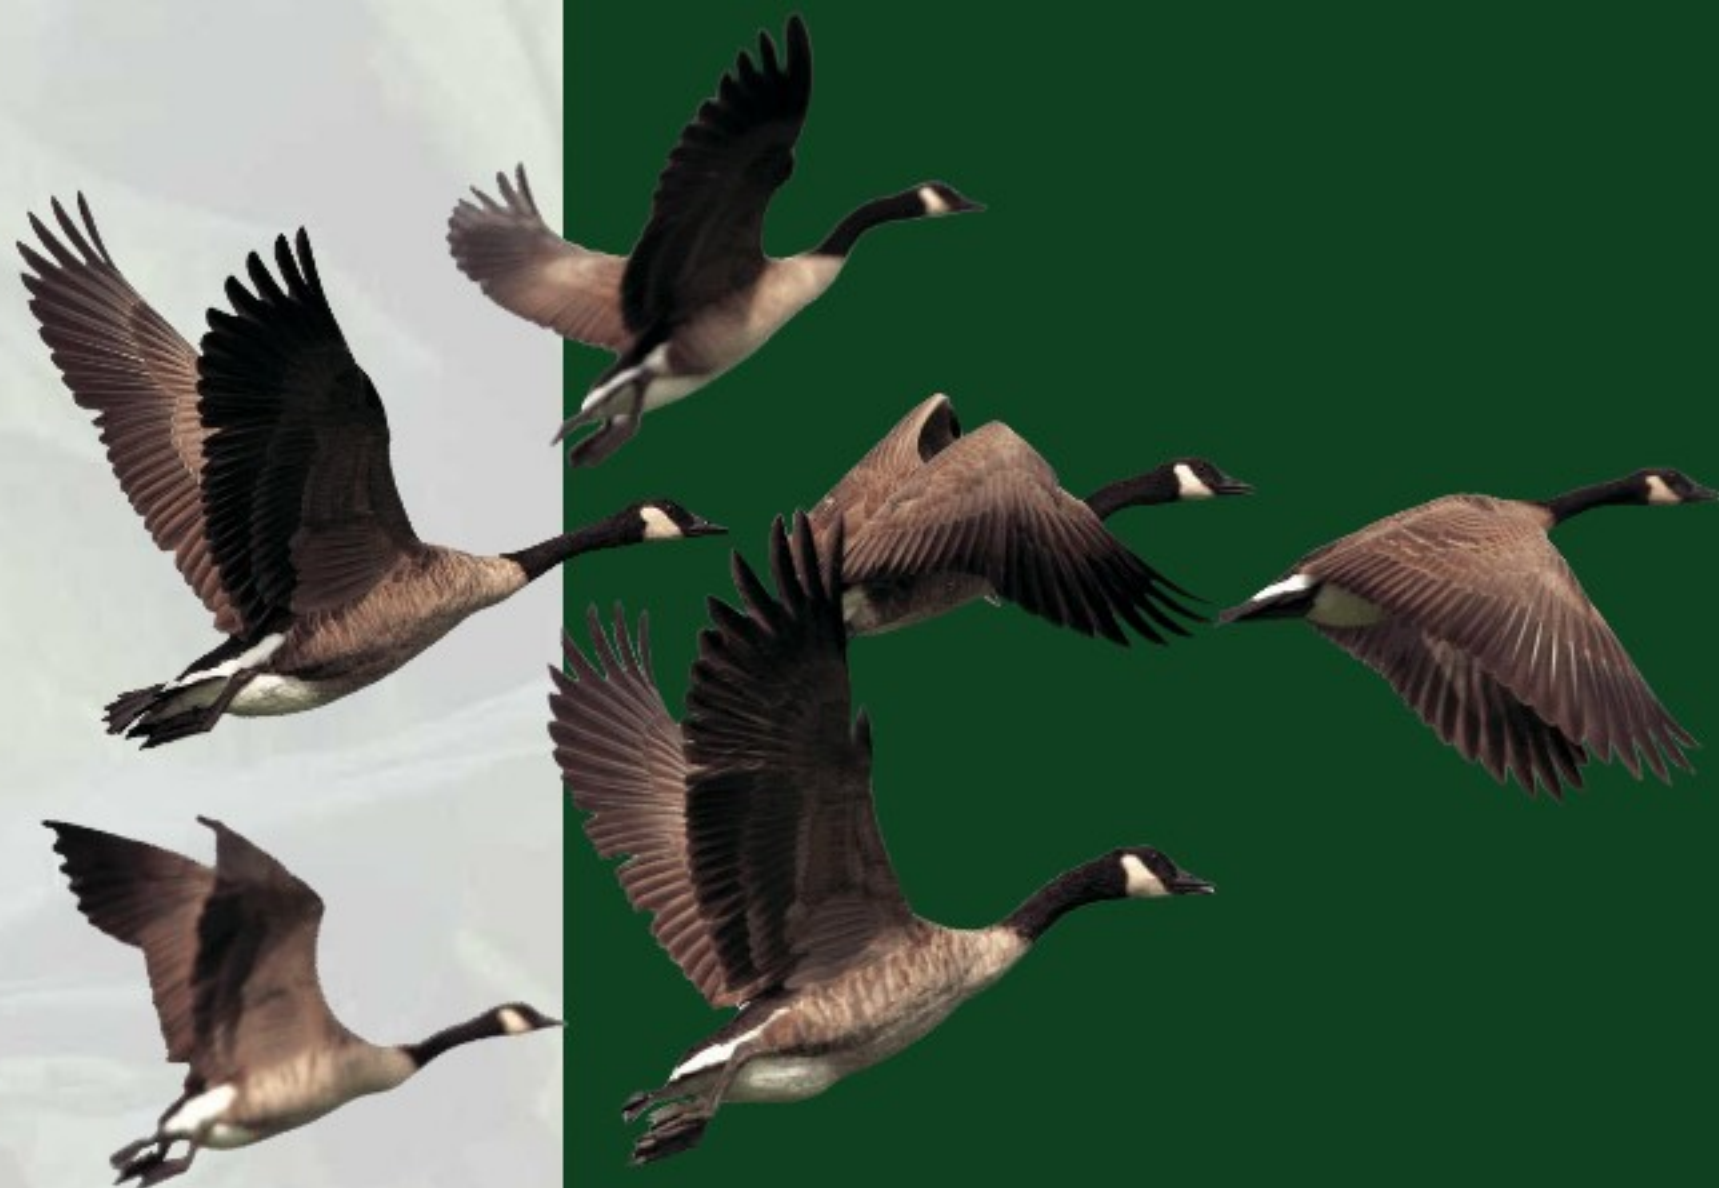

02 Mobile App Integration: Access Eco Eye on the go.

03 Community Engagement: Partnering with birdwatching groups for feedback and data sharing.

WALK THROUGH

ARE YOU ALL READY

Thank You!

Bird by Bird, Track the Changes.
